3. **Abstract:**
   Our Covid Story is a longitudinal study examining the impact of pandemic stress on health behaviors. Two cohorts of participants, from New York City and the broader United States, use a mobile app to complete approximately 5-10 minutes of self-report instruments and cognitive tasks daily for 6-18 months. This project is designed to assess social, psychological, economic, and infection-specific stressors, and their effects, through the duration of the pandemic.

4. **Data Description:** household labor and expenditure surveys, self-reported stress and anxiety measures; decision-making tasks, political and media preferences, financial and job status

5. **Key words:** Stress, Anxiety, Risk, Temporal Discounting, Individual Differences, Cognitive Function
